Sprint 3 Report
Drawify Team
Feb 27, 2023

Actions to stop doing:
We should stop working individually. We have many working individual components, but we
haven't been able to put everything together.

Actions to start doing:
We should start working together more in order to wrap up everything. And we should start
giving more updates to each other about our progress, so if one person is facing some trouble
to complete their task, the team would be aware of it and someone whose task depends on that
person's task could start working on something else instead of waiting and doing nothing.

Actions to keep doing:
Each member focuses on one component (frontend, backend, server, etc) of the project. And
we support each other if communication or interaction is needed between different components.

Works completed:
- finishing up whiteboard
- lobby system
- chatbox
- connecting the above modules to database
